Magento (V2)
Documentation

# Extension - Installation

1. Extract zip file in main folder.

2. Go to the 'code' folder inside the 'app' folder in your Magento installation directory and place the extracted folder inside the 'code' folder. So now the path would be app/code/Mips/Mipspayment

3. Put website on maintenance mode if installing extension on live website: "php bin/magento maintenance:enable"

4. Upgrade your Magento: from SSH, run the command in Magento2 root directory: "php bin/magento setup:upgrade"

5. Do setup compile through this command: "php bin/magento setup:di:compile"

6. Deployment of static content: run this command in Magento2 root directory: "php bin/magento setup:static-content:deploy"

7. Remove cache through this command : php bin/magento cache:flush

8. Remove maintenance mode through this command : php bin/magento maintenance:disable
