Orchestrating Payments

MIPS enables card payments to any bank in Mauritius.

MIPS is a Mauritian Payment Gateway that allows your clients to make payments by credit or debit cards through any bank in Mauritius. Your Shopify store is instantly updated upon a successful payment.

- Secured card payment
- Settlement in any bank in Mauritius
- No intermediate account. The money goes directly to your merchant account
- User friendly interface for payer
- 3D Secure 2.0 to secure the payments against fraud

---

2. Install the app on your Shopify store

.

⊞ Install app

MIPS
MIPS

This app needs access to:

View personal data ⌃
Store owner
Name, email address, phone number, physical address

View and edit store data ⌃
Edit other data
Payment gateways or payment sessions

Why does MIPS need data access? Check their Privacy Policy and Terms of Service.

Cancel   **Install**

3.	Configure the app using the credentials provided by MIPS:

```
Entity ID         => {short_id_form}
Merchant ID       => {short_id_merchant}
Operator ID       => {operator_id}
Operator Password => {remote_user_password}
```

4. **Enable Test Mode** in the MIPS app settings.
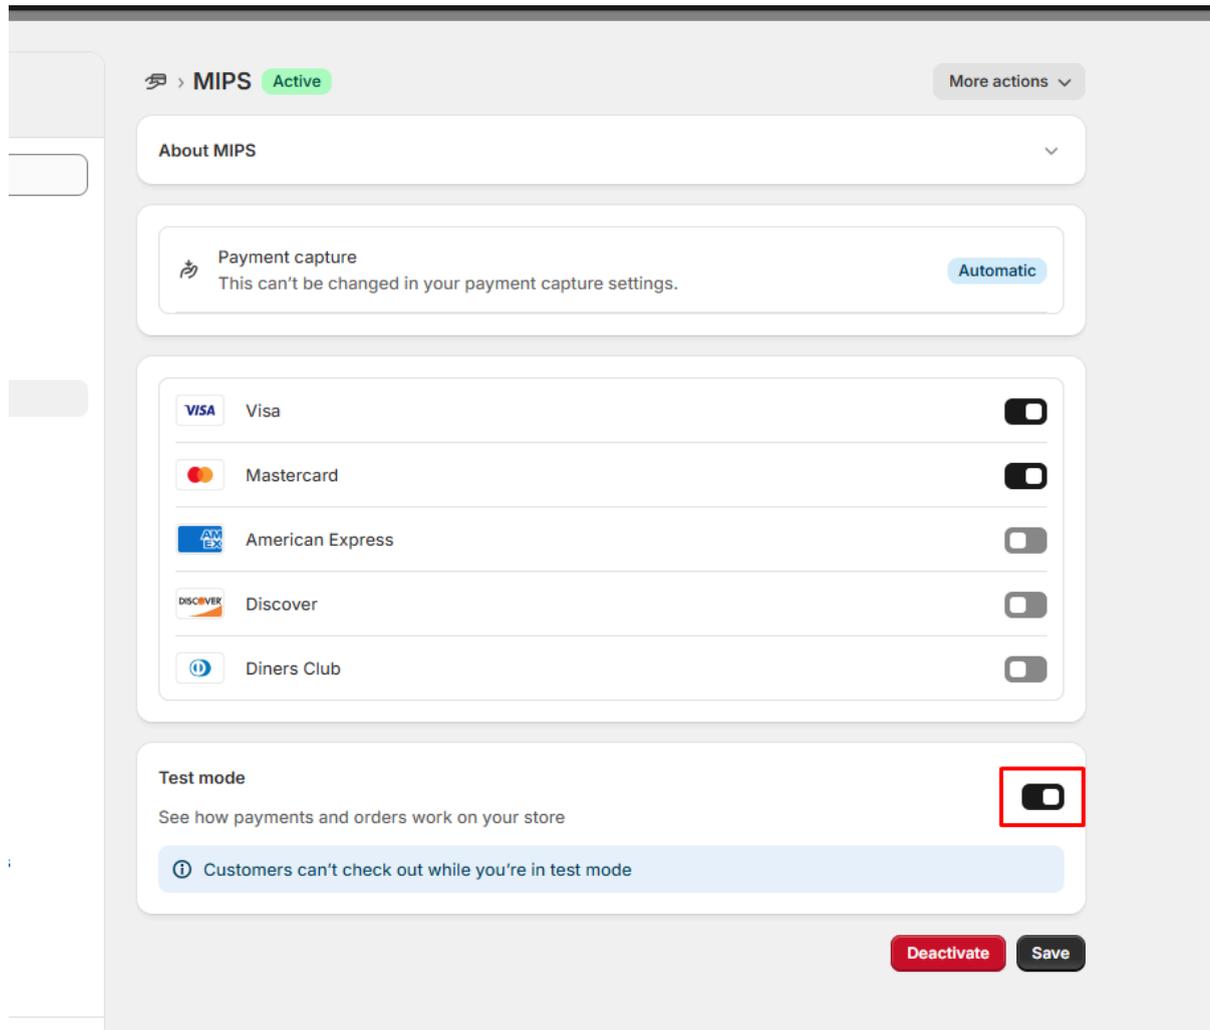

\# In case you want to access the MIPS App admin option and it is not directly accessible, replace {**YOUR STORE NAME**} and use the URL below:

https://admin.shopify.com/store/{YOUR STORE NAME}/settings/payments/alternative-providers/28704769

📄 Step 2: Provide the Following Assets

Please share the following items with MIPS to finalize the integration:

- Terms & Conditions of your website in **HTML format (no styling)**
- A **high-definition logo** of the website
- The **URL** of your Shopify website
- A **test product** priced at **Rs 1**, with **no shipping** (set to pickup option)

Once we receive these items, MIPS will configure the payment gateway and you'll be ready to proceed to Step 3.

🧪 Step 3: Test the Integration (Test Mode)

You can test the payment flow using the card details below:

- **Card Number**: 5123 4500 0000 0008
- **Expiry Date**: 12/26
- **CVV**: 100

During checkout, you'll see an **ACS Emulator screen** (3-D Secure simulation). Simply click **Submit** to proceed.

This screen appears because the integration is currently in **Test Mode**.

🚀 Step 4: Live Payment Activation

After successful testing in Test Mode, we will activate the payment gateway on our side and notify you.

At that point, please **disable Test Mode** in the MIPS app and perform a **live transaction using real funds** to confirm everything is working properly.

Let me know once you've completed the above steps or if you have any questions.

Kind regards,
